Hipsters toast Venice at the spectacular new live/work lofts at Dogtown Station!

Venice, CA, March 1, 2010 – LA trendsetters gathered at Dogtown Station Lofts in Venice on Feb 25th for an evening hosted by jeweler Charlotte Bjorlin D'Elia.

Guests from entertainment, fashion and media toured the live/work lofts and enjoyed the playlists of DJ Adam Loom as the sampled hors d'oeuvres from Venice hotspot Ado. A fashion insider found the future home for her office, while a screenwriter left with a custom layout for a live/work space. Celebrating the burgeoning talents of the Venice arts community, the soaring loft space exhibited works by award winning photographer Nicole Giaudrone and up and coming painter Michelle Oppenheimer. Partygoers were also treated to a sultry performance by Venice burlesque troupe Je Suis Femme, who brought down the house.

Dogtown Station, 35 live/work lofts located on Main Street in Venice, is brought to you by the team behind Electric lofts and Venice Art Lofts. Connecting Venice Artlofts to the north with Abbot Kinney to the south, these New York style lofts are creating a SoHo like community at the heart of Venice. Whether used as a creative office, a living space or both, the lofts invite personal adaptation.

Dogtown Station is developed Robert D'Elia, whose team brought Electric lofts and VeniceArtLofts, as well as the visionary adaptive reuse of 1100 Wilshire, downtown Los Angeles.

Dogtown Station works with each loft buyer to realize a custom layout, designed for their specific needs.
